

WETSUIT MEASUREMENT FORM

Input measurements in the fields in centimeters

inblue

SPECIAL DIVING EQUIPMENT

Total height

Body weight (kilos)

01a Head circumference (measured at its max amplitude)

01b Distance between eyebrows and the neck's base (from the middle of the forehead to the rear base of the neck, passing over the head, without bending it)

02 Neck circumference

03 Shoulders width (the distance between the two clavicles)

04 Chest circumference (taken horizontally, at its max amplitude, just under the armpits)

05 Waist circumference (taken at the waist's socket)

06 Pelvis circumference (taken around the upper hips, at the level of iliac bone)

07 Length from clavicles to the the height of head of crural bone

08 Sleeve lenght

(from the humerus to the wrist)

09 Biceps circumference (the arm must be close to the body)

10 Elbow circumference (the arm is only slightly bent)

11 Forearm circumference (at the max amplitude point)

12 Wrist circumference

13 Wrist to elbow distance

14 Thigh circumference (just under the groin)

15 Thigh circumference (in the middle)

16 Knee circumference

17 Calf circumference (at the max amplitude point)

18 Ankle circumferennce

19 Groin to ankle distance (measure the inner side of the leg from the groin to the ankle, where the malleolus is)

20 Knee to ankle distance

(from the knee to the malleolus)

21 Waist to ankle measure

(taken externally, from the waist socket to the ankle, where the malleolus is)
